What is Forex?

Forex is one of the most enormous and liquid markets around the globe. In 2010, the forex market accounted for more than 3 trillion dollars of daily trading. Over the last decade, a 40% increase in the daily volume of forex trade with 6.6 trillion Dollars each day is seen. This marks a nine-year peak since 2010. But the surprising fact is that the market did not exist a century ago. Unlike the stock market, we can not trace the roots of the forex market.

Real Estate

Selling a real estate property, be it a home, apartment, or office building, isn't as simple as having a large sale or selling an item online.

Real estate trading involves buying real estate with the intention of only holding it for a short period of time, in order to look to sell it later for a profit. Real estate trading is distinct from real estate investing in the same way that investing in stocks differs from trading stocks, where investing involves long term speculation and trading speculates during a shorter time frame.
